Zenith Aspiration Catheter

Registration Certificate No.20223031222

Innovative technology makes vascular treatment easier

# Zenith Aspiration Catheter

The Zenith Aspiration Catheter is designed for aspiration thrombectomy. It offers an ideal combination of excellent distal trackability and a large 0.070" lumen to help with rapid recanalization of the affected vessel.

## ● Ultra-soft tip

## ● Large 0.070" Lumen

- Captures large clots and greater clot burden.

## ● More Aspiration Power

- Greater aspiration power and force allow for rapid vessel recanalization.

## ● Navigation and Trackability

- Lubricious coating and smooth catheter transitions allow for easy access to MCA and beyond.

## Aspiration Pump
