

Developing Innovative Technologies To Optimize Vascular Treatment

The First Carotid Balloon Catheter with a Distal Embolic Protection Devices Retrieval Sheath

Distal Retrieval Sheath Design

· Enables retrieval of embolic protection devices without device exchange, simplifying the procedure.

• Muti-Wing Folding Design

· Facilitates smoother deflation and achieves a smaller crossing profile after rewrapping.

Rapid-Exchange Design

No guidewire exchange required;
allows single-operator use for greater simplicity and safety.

Higher Rated Burst Pressure

 Provides safer post-dilatation and enhances stent apposition.
